Ross Lane

I am a hard-working and creative individual with a background in game development, now branching into web technology. My core understanding of web development fundamentals comes from completing a full-stack Udemy course. I have been further enhancing my skills through online courses and YouTube tutorials, building applications using modern frameworks such as React and Next.js. I am looking to transition from a self-taught role into a structured, professional web development environment, where I can utilise my current skills to contribute to more impactful and larger projects used by other people.
